Policy Owner: Assistant Director of Business Services	**Approved:** Mike Tessean, Director		

I. PURPOSE:

This policy establishes a formal Information Technology (IT) Governance Program. The policy and the related agency-wide processes ensure alignment among OYA IT investments, the agency's business strategy, and desired outcomes to achieve effective and efficient use of information technology.

II. POLICY DEFINITIONS:

Business: The core mission and operations of OYA, which include managing juvenile justice programs, rehabilitation efforts for youth, public safety, and the overall effectiveness of services delivered to youth, families, and communities. It also encompasses internal administrative functions, such as resource management, casework processing, and the technology that supports them.

IT governance: The mechanism by which an organization implements, manages, and monitors its IT investments to achieve effective and efficient use of information technology.

IT Governance Committee (ITGC): The group that oversees OYA IT investments to ensure that IT investment decisions (a) deliver value to the business; (b) are aligned with business strategic goals and priorities; (c) are within acceptable levels of risk, and (d) are aligned with State guidance for IT governance. The committee assumes responsibility for strategic decisions regarding IT resources and investments to support OYA's mission.

IT investment: Expenditure of financial or staff resources on information technology, including computing infrastructure or other technological services and applications that support the daily operations and the agency's mission.

IT request: A formal submission requesting the expenditure of IT resources (either financial or staff) on information technology, including computing infrastructure or other technology services and applications in support of the daily operations and the agency's mission.

OYA Executive Team: An executive staff group that provides oversight of agency operations. Membership includes the director, deputy director, assistant directors, and other persons as requested by the executive team.

III. POLICY:

IT investments and technological solutions are evaluated and implemented to support an inclusive and equitable environment, ensuring that technology serves the needs of all individuals within OYA, including youth, staff, and stakeholders, without bias or discrimination.

This policy applies to anyone at OYA who is involved in IT decisions, whether they request, influence, or support them. All IT decisions must follow the standards below to keep technological efforts coordinated and prevent confusion.

IV. GENERAL STANDARDS:

A. OYA IT Governance Process

1. OYA must have a written agencywide process documenting how IT investments are identified, analyzed, reviewed, and approved or deferred. (See OYA IT Governance Process.)

2. The written process must also describe how OYA monitors anticipated IT investment results.

B. OYA's IT Governance Structure

1. OYA's IT governance body is the IT Governance Committee (ITGC).

2. The ITGC must have a charter approved by the OYA Executive Team.

3. As referenced in the ITGC Charter, the committee is composed of seven voting members and three nonvoting members. The charter further specifies the roles and composition of these members.

4. The ITGC is the sole authority for approving IT investments. The ITGC must operate by consensus. If consensus cannot be reached,

decisions require a two-thirds majority vote of voting members present, provided a quorum is met. Quorum is defined as a simple majority of voting members. The ITGC chair may make a final decision only if a quorum is met, but no resolution occurs after two voting attempts.

5. As referenced in the ITGC Charter, the committee determines priorities and makes decisions regarding IT requests to ensure that IT investments are aligned with business strategies and desired outcomes. ITGC must apply a weighted prioritization model described in the OYA IT Governance Process document.

6. The ITGC must establish assurance checkpoints so that Executive Branch projects do not conflict or impact enterprise initiatives that are time-bound.

7. The ITGC must ensure accountability in IT governance approvals, decision-making, and risk acceptance.

8. The ITGC must meet quarterly and perform a portfolio review annually, by June 1 of each year. The annual review ensures that each investment has delivered on its stated objectives and achieved the desired outcomes, providing an opportunity for strategic adjustments when necessary.

   a) The IS Management Team must prepare the proposed annual updates.

   b) ITGC must review the updates and provide any additional recommendations for the OYA director.

   c) The OYA director must approve of the portfolio by June 1 each year.

9. The ITGC must evaluate emerging technologies such as Artificial Intelligence (AI) for ethical use, data privacy, and security in alignment with OYA’s mission, vision, and values and the State of Oregon’s AI guidelines.

10. Projects must be escalated to the ITGC based on the criteria and thresholds outlined in Section 6.2 of the IT Governance Process. Assurance checkpoints, as defined in subsection 6 above, will be applied as appropriate.

    These criteria include effort, budget, risk level, data classification, external dependencies, and strategic impact. Assurance checkpoints must also be applied to ensure Executive Branch Projects do not conflict with enterprise initiatives.

C. This policy must be reviewed for possible updates at least every two years in accordance with OYA policy I-E-1.1 OYA Administrative Rule, Policy, Procedure, and Protocol Development.

D. Documentation

The ITGC must ensure that all governance decisions, including approvals, risk considerations, outcomes, and accountable parties, are formally documented and traceable. All ITGC-related documentation must be retained in accordance with OAR 166-300 State Agency General Records Retention Schedule to support compliance, audit readiness, and long-term accountability.

E. The IS Management Team must create and publish ITGC approved quarterly and annual reports on the OYA public internet website.

V. LOCAL OPERATING PROTOCOL REQUIRED: NO
