

STATEWIDE POLICY

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES STATEWIDE POLICY	NUMBER 107-004-180	SUPERSEDES IT Project Prioritization: An Agency Instruction Guide (2025-2027)
	EFFECTIVE DATE March 12, 2026	PAGE NUMBER Pages 1 of 3
	REVIEWED DATE March 12, 2026	
DIVISION Enterprise Information Services (State CIO)	REFERENCE • ORS 276A.203 • Senate Bill 1090 (2025) • Information Technology Readiness Statewide Procedure 107-004-180_PR	
POLICY OWNER Administrative Services		
SUBJECT Information Technology Readiness	APPROVED SIGNATURE  Terrence Woods, State Chief Information Officer	

PURPOSE

This policy establishes requirements for agencies to request funding for information technology (IT) budgets and IT projects, including replacements, modernizations, upgrades and expansions of IT systems. This policy supports an approach for prioritizing IT funding requests for the Oregon Executive Branch.

APPLICABILITY

This policy applies to all state agencies as defined in ORS 174.112, and includes any board, commission, department, division, office or other entity within the Oregon executive department. The following agencies and boards are excluded:

- Secretary of State
- State Treasurer
- Oregon State Lottery
- Public university listed in ORS 352.002
- Semi-independent agencies listed in ORS 182.454
- Oregon Film and Television Office (ORS 284.365)
- State Fair Council (ORS 565.555)
- Travel Information Council (ORS 377.840)

DEFINITIONS

Information technology (IT): all present and future forms of hardware, software and services for data processing, office automation and telecommunications. Services relate to Enterprise Information Services service lines including geographic information systems (GIS) and data inventory related activities.

IT project: a temporary technology endeavor undertaken to create a unique product, service, or result. Typically, projects have project managers assigned, are approved by agency governance and are officially chartered. A project may be a component of an IT program.

GENERAL INFORMATION

Each state agency that intends to request funding (regardless of fund type) for an IT budget or IT project shall submit the request in the format and timeframe detailed in Statewide Procedure 107-004-180_PR Information Technology Readiness. IT projects exceeding the cost of \$1,000,000 require a prioritization business case and project prioritization worksheet. The project prioritization worksheet is a component of the [IT Readiness Workbook](#).

IT budget requests may include the agency's current service level budget amount for positions, services and supplies, capital outlay as well as additional needs above the current service level. IT budget requests may also include needs for IT projects that fall below the \$1,000,000 threshold.

Each request should clearly present alignment with the prioritization criteria (Attachment A). Detailed questions to conduct prioritization analysis are available in the [IT Readiness Workbook](#).

IT Requests Prioritization

The State Chief Information Officer (CIO), in collaboration with the Legislative Fiscal Office (LFO), shall establish criteria for assigning priorities among the requested IT budgets and IT projects.

Enterprise Information Services (EIS), in collaboration with affected state agencies, shall evaluate submitted IT budget and IT project requests, using the prioritization criteria (Attachment A).

EIS shall recommend priority rankings of the requests for the State CIO approval, in the following contexts:

- requests within each state agency
- requests within a legislative program area
- requests for the executive department as a whole

IT Funding Reporting

The State CIO shall, not later than November 30 of each even-numbered year, submit to the Governor and the Joint Legislative Committee on Information Management and Technology a report that includes:

- priority ranking of requests within each state agency
- priority ranking of requests within an Executive Branch program area
- priority ranking of requests for the executive department as a whole
- recommendations for design, delivery and management of identified IT services as enterprise or shared IT services
- status of new enterprise or shared IT services
- a description of critical IT system or services needs not otherwise identified within the priority rankings

The State CIO, not later than October 31 of each odd-number year, in collaboration with the LFO, shall submit to the Governor and the Joint Legislative Committee on Information Management and Technology, a report that lists all the IT budget and IT project requests that the Legislative Assembly approved in the prior concluding legislative session.

Attachment A: Prioritization Criteria

Strategic Alignment

- (1) Aligns with and supports implementation of the Enterprise Information Resources Management Strategy described in ORS 276A.203 (4)(a)(M) (...the Enterprise Information Resources Management Strategy must provide for integrating statewide technology initiatives, ensuring compliance with information technology rules, policies and standards, promoting coordination, consolidation and alignment of information resources and technologies and effectively managing the state's and state agencies' information technology portfolios.)
- (2) Aligns with the agency's IT and business strategic plans

Technology Best Practices

- (1) Enhances the information security posture of the agency or the state
- (2) Involves or promotes the use of shared systems, resources or data
- (3) Aligns with the State CIO adopted technology standards
- (4) Uses commercially available systems or software

People and Business -Centered Approach

- (1) People-centered approach
- (2) Business process transformation
- (3) Investment risk (investment fulfills a legislative mandate, enables compliance with current state or federal law, or addresses specific audit findings)

Agency Readiness and Solution Appropriateness

- (1) IT governance and project management processes
- (2) Organizational change management
- (3) Solution scale and approach
- (4) Capacity
