

Operational Policy

Policy title:	Information Security Incident Management Policy		
Policy number:	ODHSOHA 090-005		
Original date:	10/01/2004	Last update:	11/01/25
Approved:	Kris Kautz, OHA Seth Lyon, ODHS		

Purpose

The Oregon Department of Human Services (ODHS) and the Oregon Health Authority (OHA) are committed to identifying, analyzing, remediating, documenting, and reporting any information security incident that compromises ODHS and OHA information and systems.

Description

This policy describes the responsibility of ODHS and OHA staff to report known or suspected information security incidents. This includes sensitive, confidential, or protected information.

Applicability

This policy applies to all ODHS and OHA staff including employees, volunteers, trainees and interns as well as contractors and partners.

As keepers of the public trust, all agency employees have a responsibility to comply with state and agency policies, administrative rule, and state and federal law. The agency takes this responsibility seriously and failure to fulfill this responsibility is not treated lightly. Employees who fail to comply with state or agency policy, administrative rule, or state and federal law may face progressive discipline, up to and including dismissal from state service.

Policy

1. ODHS and OHA staff have a responsibility to promptly report any known or suspected information security incidents. Reports made in good faith will be taken seriously and handled appropriately, in alignment with agency policies and procedures. Examples of an information security incident include, but are not limited to:
 - a. Attempted or successful unauthorized access, use, disclosure, modification, destruction of information, or interference with system operations in an information system.
 - b. Violations of ODHS and OHA information security policies and processes. For example, staff sharing their login credentials.
 - c. Violations of the Statewide Information Technology Control Standards. For example, editing or modifying system records without approval.
2. When ODHS and OHA staff discover an information security incident or potential information security incident, staff shall follow the reporting process as outlined in the ODHSOHA 090-005-01 Information Security Incident Reporting Process.

3. When an information security incident is reported, ISPO will lead the investigation and will follow the ODHSOHA Information Security Incident Response plan when applicable
