

OREGON STATE HOSPITAL

POLICY

SECTION 6: Patient Care **POLICY: 6.028**

SUBJECT: Education for Patients

POINT PERSON: Director of Vocational,
Educational, Spiritual, Peer
Recovery and Native Services

APPROVED: Sara Walker, MD

DATE: JULY 25, 2024

Interim Superintendent

SELECT ONE: ☐ New policy ☒ Minor/technical revision of existing policy
☐ Reaffirmation of existing policy ☐ Major revision of existing policy

I. PURPOSE AND APPLICABILITY

- A. Oregon State Hospital (OSH) provides a collaborative learning and education environment to support treatment and recovery. OSH will therefore provide education resources, programs, and activities for individualized patient treatment in accordance with regulations and best practices for patient care. Whenever possible, educational resources should be evidence based in accordance with the definitions of evidence-based practices set forth by the Oregon Health Authority.
- B. The Policy applies to all staff.

II. POLICY

- A. Every interdisciplinary treatment team (IDT) will assess patient learning and education needs and will document the findings on the Patient Learning Needs Assessment (PLNA) form. They will coordinate completing the form by the 10th day after the patient's admission and will collaborate with the patient to establish appropriate treatment care plan (TCP) interventions as needed.
- B. Patient education is the process by which staff and others convey information to patients and their caregivers that will affect or improve their health behaviors or health status. To support patient education, OSH provides patient-centered therapeutic treatment, education, and activity programs, including:
1. treatment malls;

2. psychiatric rehabilitation programs for acquiring skills and accepting supports necessary for achieving a specific patient goal in a vocational, living, social, or educational environment;
 3. vocational preparation programs;
 4. academic programs;
 5. educational materials; and
 6. educational equipment, including computerized and audio-tutorial formats.
- C. Educational services and consultation are available on a referral basis through Dietary Services, Pharmacy, Spiritual Services, Educational Services, and other clinical or treatment services staff who provide patient education as a part of their job function.
- D. Clinical disciplines, including Pharmacy staff, must provide the patient with sufficient information and education about their treatment, including medications and treatment options, to make informed decisions and participate in their care.
- E. At the time of discharge, every patient must be provided with pertinent discharge information and other instruction as needed per OSH Policy and Procedure 6.013, "Discharge and Conditional Release Planning". Educational needs not identified to be a priority during hospitalization should be addressed through community referral and discharge planning.
- F. All education provided to a patient must be documented. The patient's response to education and progress towards educational goals must be documented in progress notes as delineated in OSH Policy 6.045, "Clinical Documentation". Patient education provided in treatment mall groups must be documented in group notes per the same policy.
- G. OSH follows all applicable regulations, including federal and state statutes and rules; Oregon Department of Administrative Services (DAS), Shared Services, and Oregon Health Authority (OHA) policies; and relevant accreditation standards. Such regulations supersede the provisions of this policy unless this policy is more restrictive.
- H. Staff who fail to comply with this policy or related policy attachments or protocols may be subject to disciplinary action, up to and including dismissal.

III. DEFINITIONS

- A. "Staff" includes employees, volunteers, trainees, interns, contractors, vendors, and other state employees assigned to work at Oregon State Hospital (OSH).
