

OREGON STATE HOSPITAL

POLICY ATTACHMENT

PROCEDURES A: STR Process

POLICY: 8.039

POINT PERSON: Director of Security

APPROVED: Interim Superintendent

DATE: JULY 17, 2024

SELECT ONE:

- ☐ New policy attachment
 ☒ Minor/technical revision of existing policy attachment
☐ Reaffirmation of existing policy attachment
 ☐ Major revision of existing policy attachment

Responsible Person/Group	Procedures
Security	1. Arrive at patient's home unit to pick up a .370 patient, GEI or EDP patient without off-grounds privileges and bring to the designated sallyport for transport. 2. Follow established Security Department protocols and associated policy. 3. Upon return to the unit Transport staff who removed the STRs are responsible to report to the UNIT RN that the patient was wearing STR's. 4. This must be documented per OSH Security Protocol 6.015.
Nursing	1. Contact Reception or Junction City Access Control for any unanticipated or emergency transport of a .370 patient or a GEI or EDP patient without off-grounds privileges. 2. If alternate restraint devices are necessary, follow provisions of OSH Policy and Procedure 6.003, "Seclusion and Restraints."
Registered nurse	1. If STRs are medically contraindicated, make a recommendation to law enforcement or OSH Security personnel. 2. Document the recommendation in the patient's medical record. 3. On patients return to OSH complete skin assessment and document in a progress note. On hospital level-of-care (HLOC) units, the RN may assign the Licensed Practical Nurse (LPN) to collect skin integrity data and may use that data partially or wholly in their assessment. On Secure Residential Treatment Facility (SRTF) units, the LPN may independently collect skin integrity data and must communicate the use of STRs and collected data to the covering RN.

Physician/Nurse Practitioner	1. If STRs are medically contraindicated, make a recommendation to law enforcement personnel. 2. Document the recommendation in the patient's medical record. 3. If alternate restraint devices are necessary, follow provisions of OSH Policy and Procedure 6.003. 4. In the event a civilly committed or voluntarily admitted patient experiences a behavioral emergency during a medical emergency and off-grounds transportation is necessary, consider ambulatory restraints per OSH Policy and Procedure 6.003.
Medical Clinic	Coordinate scheduled medical appointments with law enforcement and the patient's unit.
Reception / Junction City Access Control	Coordinate with law enforcement for unanticipated or emergency transport of a .370 patient or a GEI or EDP patient without off-grounds privileges.
