

OREGON STATE HOSPITAL

POLICY

SECTION 6:	Patient Care	POLICY: 6.071
SUBJECT:	Oregon State Hospital History and Physical Examination Requirements	
POINT PERSON:	Chief Medical Officer	
APPROVED:	Jim Diegel Interim Superintendent	DATE: 10/30/2025
SELECT ONE:	☒ New policy ☐ Minor/technical revision of existing policy ☐ Reaffirmation of existing policy ☐ Major revision of existing policy	

I. PURPOSE AND APPLICABILITY

- A. This policy further defines the Oregon State Hospital ("Hospital") and Medical and Allied Health Professional Staff ("MAHPS") requirements for performing and documenting Comprehensive History and Physical ("H&P") examinations, as referenced in the MAHPS Bylaws. Clinical Departments may establish additional protocols with this policy. If a department protocol conflicts with this policy, this policy takes precedence.
- B. This policy applies to Medical and Allied Health Professional Staff.

II. GUIDELINES

- A. A complete history and physical examination are required for all admissions and all inpatient procedures requiring anesthesia. OSH does not perform inpatient procedures requiring anesthesia, so this policy addresses the requirements for the admission history and physical.
- B. OSH does not currently conduct outpatient surgical or procedural services that qualify for an assessment instead of a complete history and physical examination. As stated in the Medical Staff Bylaws, if OSH conducts qualifying outpatient surgical or procedural services in the future, the medical staff shall define the specific types of patients and/or procedures that qualify for an assessment instead of a complete history and physical examination.

-
- C. As stated in the Medical Staff Bylaws, a history and physical examination shall be completed no more than thirty (30) days before or twenty-four (24) hours after admission or registration.
 - a. If the history and physical examination cannot be completed due to the patient's condition, including refusal, the medical record shall be updated to reflect the attempt to complete the history and physical examination in accordance with protocol Med-Clin 8.001 Admission, Annual and Discharge Physical Exams and Laboratory Evaluations, Including Refusals.
 - b. If the history and physical examination were completed within thirty (30) days before registration or inpatient admission, an update documenting any changes in the patient's condition is required within twenty-four (24) hours after registration or inpatient admission.
 - D. A complete history and physical examination report must include the following information:
 - a. Chief complaint or reason for the admission or procedure,
 - b. A description of the present illness,
 - c. Past medical history, including medications, allergies, past and present diagnoses, illnesses, operations, injuries, treatment, and health risk factors,
 - d. An age-appropriate social history,
 - e. A pertinent family history,
 - f. A review of systems,
 - g. A screening neurological exam, including the cranial nerves, with a complete neurological exam if indicated,
 - h. Cardiorespiratory exams,
 - i. Other relevant physical exams, and
 - j. Documentation of medical decision-making, including a review of diagnostic test results, response to prior treatment, assessment, clinical impression or diagnosis, plan of care, evidence of medical necessity, and appropriateness of diagnostic and/or therapeutic services, counseling provided, and coordination of care.
 - E. The practitioner performing the history and physical is expected to use his or her clinical judgment based on the patient's condition to determine the extent of additional examination. MAHPS has developed guidelines that can be referenced in Med-Clin 8.001 Attachment A: Guidelines for the History and Physical Protocol.
 - F. A Doctor of Medicine (MD), Doctor of Osteopathy (DO), Nurse Practitioner (NP) or Physician Assistant (PA) with admitting privileges are permitted to complete the history and physical examination if it's within the practitioner's scope of practice for the care of the medical problem that may be present on admission or

that may arise during an inpatient stay. These practitioners must be granted the appropriate clinical privileges to perform the history and physical.

- G. Oregon State Hospital (OSH) follows all applicable regulations, including federal and state statutes and rules; Oregon Department of Administrative Services (DAS), Shared Services, and Oregon Health Authority (OHA) policies; and relevant accreditation standards. Such regulations supersede the provisions of this policy unless this policy is more restrictive.
- H. Failure to comply with this policy or related policy attachments or protocols may be subject to disciplinary action.
