Status of Work/History:

This policy has several ADs and has been a part of CMS survey activity due to contraband coming in through the mail. Patient funds and valuable handing in mail is a hot topic, engage with Security, floor staff and business office for process finalization. This policy nearly went to panel but we need to do a final review with security and Ernestina.

Hurdles:

rabbit holing- there are many issues and questions around mail because of the recent process changes- this will likely not be a perfect update but can revise afterwards- remind the group of this.

Next Steps:

- review final policy with Ernestina and security
- bring to policy panel

Timelines/Deadlines:
