## POLICY ATTACHMENT

**PROCEDURES A:** Personal Protective Equipment Specific Guidance

**POLICY: 8.031**

**POINT PERSON:** Director of Safety

**APPROVED:** Interim Superintendent

**DATE:** October 15, 2024

**SELECT ONE:**

- ☐ New policy attachment
- ☒ Minor/technical revision of existing policy attachment
- ☐ Reaffirmation of existing policy attachment
- ☐ Major revision of existing policy attachment

| Personal Protective Equipment                   | Procedures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Gloves for patient contact and general cleaning | <ol style="list-style-type: none"><li>Staff will have access to single-use nitrile gloves and other non-latex gloves.</li><li>Staff with an allergy or sensitivity to nitrile may order reusable cotton liner gloves available through Warehouse.</li><li>Alternatively, staff with a nitrile allergy or sensitivity may obtain a note from their primary care provider attesting to the sensitivity or allergy and submit the note to a manager.<ol style="list-style-type: none"><li>The manager must submit the note to Human Resources.</li><li>Human Resources will authorize the staff member's work area to purchase other non-latex gloves.</li></ol></li><li>All gloves must be immediately removed upon completion of the task for which the gloves were donned. Staff must change gloves between every patient contact. Gloves must be disposed of in regular trash bags and receptacles.</li></ol> |
| Surgical Masks                                  | <ol style="list-style-type: none"><li>Staff are required to wear surgical masks when patients are ill from an acute respiratory illness, or per infection control procedures, or based on Chief Medical Officer's "mask on" directives.</li><li>Mask must be worn completely over the nose and mouth and fit snugly against the sides of face without gaps.</li></ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                 | <p>3. Masks must be disposed of in regular trash bags and receptacles and replaced when visibly soiled, damaged, or when saturated with respiratory secretions or based on specific hospital wide or infection control procedures.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Eye & Face Protection<br>(Goggles/Face Shields) | <p>1. Staff must inspect and check eye and face protection before and after each use for damage, excessive wear, or missing pieces.</p> <ul style="list-style-type: none"><li>a. Staff must remove damaged or broken eye and face protection from work areas to avoid being use.</li><li>b. Management must conduct routine inspections and checks to ensure eye and face protection are free of defects and replace as necessary.</li></ul> <p>2. Eye and face protection will be worn in work areas or during procedures which are known or likely or suspected to cause droplets, splashing, spraying, spitting or flying particles.</p> <p>3. Eye and face protection must be washed and disinfected using non-abrasive soap and water following each use and any time they become contaminated.</p> |
| Gowns                                           | <p>1. Gowns must be worn during procedures in which the possibility or likelihood of splashing, spraying, infesting, or soiling of clothing may occur. Gowns must also be worn in accordance with any isolation or quarantine precautions in effect.</p> <p>2. Gowns must be removed before leaving the room in which the procedure took place or immediately upon completion of the task for which PPE is required. Gowns must be disposed of in regular trash bags and receptables.</p>                                                                                                                                                                                                                                                                                                                |
| Shoe Covers                                     | <p>1. Show covers should be used when blood and body fluid spills or floor contamination is recognized or anticipated.</p> <p>2. Shoe covers must be removed and disposed of in regular trash bags and receptables at the site of use after the affected area is cleaned and disinfected.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| N-95 Filtered<br>Facepiece/CAPR/PAPR            | <p>1. Requires completion of fit test process in Procedure B prior to issue and use.</p> <p>2. Staff will be provided with initial and refresher training on how to maintain and use the N-95 mask during their fit testing.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|                                                           |                                                                                                                                                                                                                                                                                                                                                                                           |
|-----------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                           | 3. N-95's should be replaced and disposed of in regular trash bags and receptables when wet, soiled, damaged, or as otherwise determined by the Safety Office.                                                                                                                                                                                                                            |
| Full and Half-Face Respirators<br>(Occupational Exposure) | <ol style="list-style-type: none"><li>1. Requires completion of fit test process in Procedure B prior to issue and use, and with recertification annually.</li><li>2. Staff will be provided with initial and refresher training on how to maintain and use full and half-face respirators during thier fit testing.</li><li>3. Individually issued and maintained by the user.</li></ol> |
